

**Consultant Flowchart for the Screening, Assessment and Management  
of Risk associated with Covid-19**

**Virtual Consultation**  
(Face to face only if necessary)

**Consultant feels the need to bring the Patient  
In for a face to face consultation / diagnostics / surgical intervention**

**OUTPATIENTS**

- Complete COVID-19 Risk assessment over the phone and document in clinic letter or patient record
- Ask patient to start self-isolating to reduce risk
- On arrival at Bay report to foyer to have your temperature checked
- You will be provided with a face mask to wear
- Gel your hands

**DIAGNOSTICS**

- Complete COVID-19 Risk assessment over the phone and document in clinic letter or patient record
- For spinal injections complete Injection of Steroid into a Joint during COVID-19 patient consent form.
- Ask patient to start self-isolating to reduce risk
- Complete fillable PDF referral form and email to CBH Imaging Department via:  
[vh.imaging@nuffieldhealth.com](mailto:vh.imaging@nuffieldhealth.com)

**\*\* STRICTLY NO WALK INS \*\***

**SURGICAL INTERVENTION**

- Discuss COVID consent form with patient
- Complete Private Patient Referral Outcome (Prioritisation) Form
- Complete Booking Form
- MAC prioritisation process takes place (**process to be confirmed shortly**)
- Bookings will schedule POA, send out consent form in post with TCI date
- POA will assess via telephone and any required tests will be booked into the Bay (Blue pathway)
- Patient to then start 14 day isolation (POA will trigger this)
- Patient called 3 days pre-surgery for COVID testing via drive through

**(only exception to this is for elite sports players where evidence of a negative Covid test is required and confirmation of isolation between test and surgery date)**
